

Home Network Security Dashboard -

Security monitoring dashboard summarizing Nmap-based asset discovery, exposed network services, and security-relevant services identified on the home network.

Global Time Ran...

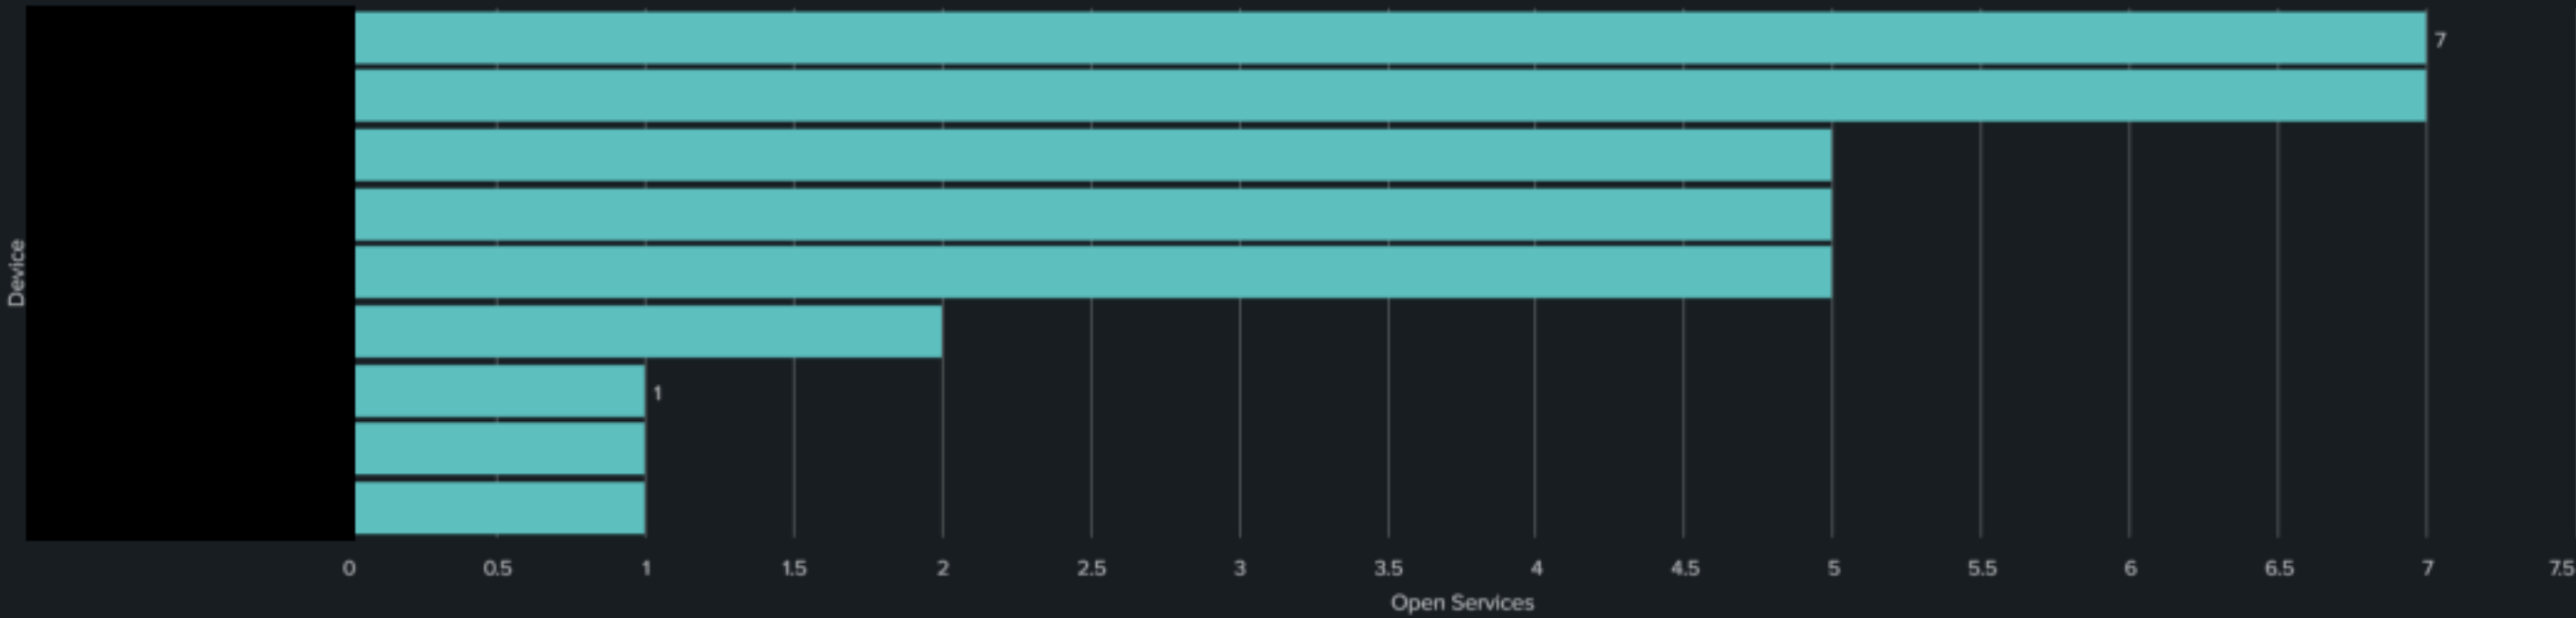

All time

Security-Relevant Network Services

ip_address ↕	hostname ↕	port ↕	protocol ↕	service ↕	security_category ↕
		445	tcp	microsoft-ds	SMB / File Sharing

Open Services by Host

Security-Relevant Services by Category

Network Service Inventory

Complete inventory of open TCP services identified during Nmap Service enumeration

device ↕	ip_address ↕	port ↕	protocol ↕	service ↕
		53	tcp	domain
		80	tcp	http
		5000	tcp	upnp
		8080	tcp	http-proxy
		8081	tcp	blackice-icecap
		8443	tcp	https-alt
		10010	tcp	rxapi
		554	tcp	rtsp
		554	tcp	rtsp
		554	tcp	rtsp

Open Services - Before vs After Segmentation

Compares open TCP services

Security-Relevant Services: Before vs After Segmentation

Compares security-relevant TCP services

Hosts No Longer Observed - Post Segmentation

Identifies assets found in initial scan but no longer found in final Main LAN scan

ip_address ↕	hostname ↕	mac_address ↕	observed_st... ↕
			Pre-Segmentation
			Pre-Segmentation
			Pre-Segmentation
